

Kevin Bravo

Mid/Senior Software Developer | Backend and Enterprise Systems

0bravokevin@gmail.com | kevinbravo.com | github.com/0bkevin | linkedin.com/in/0bkevin | Caracas, Venezuela

Professional Summary

Software engineer with 5 years of experience turning complex operations into clear, maintainable, and measurable enterprise systems. I have owned products from requirements discovery and data modeling through APIs, interfaces, deployment, production support, and continuous improvement. My primary stack includes TypeScript, JavaScript, Node.js, Python, Django, PostgreSQL, and SQL, with transferable foundations for working in C# or Java microservices and environments using SQL Server, MongoDB, and AWS. I am particularly interested in 789.mx's approach: understanding how a business operates, reducing friction, and building the infrastructure it needs to grow with greater control.

Professional Experience

- Proyecto Educa** *Remote, Venezuela*
Chief Technology Officer *Dec 2025 - Present*
- **Translate operational needs into architecture, priorities, and releases** for education platforms; coordinate contributors and stakeholders and remain accountable for release quality and production continuity.
- Free2Z** *Remote*
Principal Software Engineer *Apr 2025 - Apr 2026*
Open-Source Contributor *Jul 2026*
- **Led a production migration from React to SvelteKit** and delivered end-to-end workflows over Django REST APIs, PostgreSQL, Docker, GKE, Cloud SQL, GCS, Pub/Sub, and Cloud Build.
 - **Strengthened asynchronous processes, webhooks, and deployments** with idempotency, transactions, retries, ACK/NACK handling, health checks, automated rollback, and explicit failure states.
 - **Protected platform continuity** through concurrent PostgreSQL migrations, integration and concurrency tests against a real database, logging, and production debugging.
- U.S. Department of State (via AVAA)** *Remote, Venezuela*
Product Engineer | Bilingua Talent *Nov 2024 - Aug 2025*
- **Built a multi-tenant B2B platform as the sole engineer**, from stakeholder discovery to its PostgreSQL relational model, role-based access, APIs, dashboards, deployment, and maintenance.
 - **Validated the system with 50 users and 5 companies** and turned their feedback into simpler workflows, more reliable data, and better operational reporting.
- Freelance** *Remote*
Software Engineer *Sep 2024 - Dec 2024*
- **Delivered custom web products and automation workflows** across multiple sectors, covering discovery, prioritization, development, launch, iteration, and technical support.
- Asociacion Venezolano Americana de Amistad (AVAA)** *Caracas, Venezuela*
Junior Product Engineer *Oct 2022 - Jul 2024*
Software Developer Intern *Sep 2021 - Aug 2022*
- **Designed, deployed, and maintained SEP**, a multi-tenant system using Next.js, PostgreSQL, Prisma, Auth.js, and Azure that centralized activities, attendance, volunteer work, and reporting for approximately 300 scholars across 3 chapters.
 - **Built SEA for EducationUSA** to integrate student histories, services, payments, receipts, activities, partnerships, and reporting; normalized historical data through Python ETL workflows.
 - **Supported both systems in production**, resolving defects, protecting data quality, and revising workflows based on feedback from the operations team.

Relevant Community Leadership

- AVAA | Education Committee Member** *Sep 2024 - Present*
- Administer SEP and maintain attendance, volunteering, and reporting workflows for approximately 300 scholars; advise on requirements, data quality, and technical feasibility.
- JA Venezuela Alumni | Vice President** *Mar 2026 - Present*
- Set priorities with the board and coordinate operations, committees, partnerships, and projects for the national alumni network.

Education and Languages

- Instituto de Estudios Superiores de Administracion (IESA)** *Caracas, Venezuela*
Master of Public Administration, in progress *2025 - 2027*
Languages: Spanish (Native), English (C1 - Professional Working Proficiency).
