

Kevin Bravo

Developer Engineer - AI | CMC for Agent, MCP and Web3

0bravokevin@gmail.com | kevinbravo.com | github.com/0bkevin | linkedin.com/in/0bkevin | Caracas, Venezuela

Professional Summary

Product engineer with 5 years of experience turning ambiguous problems into production systems, developer-facing workflows, and reliable user experiences. Built AI agent tooling including Zrode, an agentic development environment for multi-provider coding workflows, Brio, a control plane for agent pairing, session control, relay routing, logs, and operational visibility, and Hermes, a personal agent running on an Azure VPS. Strong in TypeScript, JavaScript, Python, APIs, PostgreSQL, technical documentation, and community work, with practical Web3 and DeFi research covering EVM, Solidity, smart contract security, AMMs, lending pools, and flash loans.

Core Technical Fit for CoinMarketCap

AI agents and MCP: AI agent workflows, LLM tool use, MCP concepts, agent control planes, multi-provider workflows, session management, relay routing, logs, health checks, model comparison, and AI-assisted development.

Developer products: TypeScript, JavaScript, Python, Django, Node.js web tooling, REST and JSON APIs, API routes, Cloudflare Workers, Docker, PostgreSQL, request validation, technical documentation, open-source contribution, and developer experience.

Crypto and DeFi: EVM, Solidity concepts, Ethernaut, Damn Vulnerable DeFi, Brownie, Web3.py, smart contract security, wallet behavior, DEX AMM concepts, lending pools, flash loans, blockchain tooling, and secure contract interaction patterns.

Ecosystem and quality: Technical writing, tutorial and walkthrough development, hackathon operations, mentoring, technical demos, stakeholder education, data validation, regression checks, analytics dashboards, production logging, and failure-path thinking.

Professional Experience

Proyecto Educa

Chief Technology Officer

Remote, Venezuela

Dec 2025 - Present

- **Own product and technical direction** for education platforms, translating ambiguous stakeholder needs into architecture, implementation priorities, support workflows, testing expectations, and shipped software.

Free2Z

Principal Software Engineer

Remote, Venezuela

Apr 2025 - Apr 2026

Open-Source Contributor

Jul 2026

- **Led a live migration from React to SvelteKit** and owned production delivery across architecture, SSR, state management, performance, API integrations, testing, logs, health checks, and rollback support.
- **Built reusable product and developer workflows** including a CMS, Markdown editor, publishing system, blog engine, search, translations, live video, and interfaces connected to Django REST APIs.

U.S. Department of State (via AVAA)

Product Engineer | Bilingua Talent

Remote, Venezuela

Nov 2024 - Aug 2025

- **Built a multi-tenant professional networking and operations platform as the sole engineer**, owning stakeholder discovery, relational data architecture, role-based access, APIs, dashboards, quality checks, deployment, and support.
- **Validated the product with 50 users and 5 companies** and converted advisor feedback into clearer onboarding, service-management workflows, data quality, and reporting.

Freelance

Software Engineer

Remote

Sep 2024 - Dec 2024

- **Delivered web products, automation scripts, and API-connected workflows** across multiple sectors, moving from discovery and technical decisions through launch, iteration, and support.

Asociacion Venezolano Americana de Amistad (AVAA)

Junior Product Engineer

Remote

Oct 2022 - Jul 2024

Software Developer Intern

Sep 2021 - Aug 2022

- **Built and maintained SEP and SEA**, multi-tenant operational platforms using Next.js, TypeScript, PostgreSQL, Prisma, Auth.js, Azure, and Python workflows for approximately 300 scholars, advisors, and program staff.
- **Centralized records, services, payments, receipts, outreach, attendance, and reporting**, replacing fragmented spreadsheet processes with maintainable systems and data validation workflows.

Selected Agent, Crypto and Community Work

Zrode and Brio: Built an agentic development environment for multi-provider coding workflows and a mobile-first control plane for agent pairing, session control, relay routing, logs, and operational visibility.

Hermes: Operate a personal AI agent on an Azure VPS using persistent sessions, tool-oriented workflows, and infrastructure-aware operational practices.

Crypto technical writing: Published walkthroughs on Ethernaut, Damn Vulnerable DeFi, Brownie, wallet behavior, flash loans, lending pools, EVM concepts, and smart contract security at kevinbravo.com/0b.

Developer community: Organized the Caracas hub for a global Web3 and AI hackathon, coordinating logistics, sponsors, speakers, mentors, and participant support; Vice President of JA Venezuela Alumni and code mentor for Technovation Girls Venezuela.

Education and Languages

Instituto de Estudios Superiores de Administracion (IESA)

Master of Public Administration, in progress

Caracas, Venezuela

2025 - 2027

Universidad Central de Venezuela: Occupational Therapy, Cum Laude

2023

Languages: Spanish (Native), English (C1 - Professional Working Proficiency).
