

Kevin Bravo

Product Engineer | TypeScript, AI Agents & Full-Stack Systems

Email: obravoKevin@gmail.com | Portfolio: kevinbravo.com | GitHub: github.com/0bkevin | LinkedIn: linkedin.com/in/0bkevin
Caracas, Venezuela (UTC-4) | Remote across AMER time zones

Professional Summary

Product engineer with 5 years of experience taking ambiguous product and operations problems from requirements to architecture, data models, production software, and support. Built multi-tenant platforms, migrated a live startup product, and created AI agent tooling using TypeScript, JavaScript, React, SvelteKit, Next.js, Python, Django, PostgreSQL, REST APIs, Docker, and cloud services. Daily user and builder of agent-driven development workflows, comfortable owning features end to end, working directly with users, and shipping across frontend, backend, data, and deployment concerns.

Technical Skills

Product and full-stack engineering: TypeScript, JavaScript, React, SvelteKit, Next.js, Astro, Node.js ecosystem, Tailwind CSS, server-side rendering, responsive interfaces, product discovery, rapid prototyping, customer feedback, issue triage, code review, and release ownership.

Backend, data, and cloud: Python, Django, PostgreSQL, SQL, SQLite, REST APIs, relational modeling, schema changes, database migrations, service integrations, request validation, Docker, Azure, Cloudflare, CI/CD concepts, logs, production debugging, and familiarity with GCP and Kubernetes concepts.

AI agents and developer tools: Multi-provider coding agents, agent control planes, session management, relay routing, runtime logs, health checks, MCP concepts, Codex, Claude, Gemini, Cursor, OpenCode, model comparison, prompt iteration, and AI-assisted testing and review.

Professional Experience

Proyecto Educa

Chief Technology Officer

Remote, Venezuela

Dec 2025 - Present

- **Own product and technical direction** for education platforms, turning ambiguous stakeholder needs into architecture, implementation priorities, working releases, quality standards, and production support.

Free2Z

Principal Software Engineer

Remote, Venezuela

Apr 2025 - Apr 2026

- **Led a production migration from React to SvelteKit**, improving architecture, server-side rendering, state management, maintainability, and performance for a live startup platform.
- **Shipped full-stack features across product boundaries** by integrating Python and Django APIs, adding Dyte live video, and building a CMS suite with a Markdown editor and blog engine.

U.S. Department of State (via AVAA)

Software Engineer | Full-Stack Developer

Remote, Venezuela

Nov 2024 - Aug 2025

- **Built Bilingua Talent as the sole engineer**, owning requirements, multi-tenant architecture, relational schema, backend flows, frontend, dashboards, deployment, and maintenance.
- **Tested the platform with 50 users and 5 companies**, then converted user feedback into revised workflows, reporting, service management, and product improvements.

Asociacion Venezolano Americana de Amistad (AVAA)

Software Developer

Remote, Venezuela

Oct 2022 - Jul 2024

- **Built, deployed, and maintained SEP**, a multi-tenant platform serving about 300 scholars across 3 national chapters with Next.js, PostgreSQL, Prisma, Auth.js, and Azure.
- **Engineered SEA for EducationUSA**, centralizing student histories, outreach, services, payments, institutional relationships, and reporting in one full-stack operations platform.

Selected AI Agent Work

Zrode - Agentic Development Environment

Independent, ongoing

Built and use a unified environment for multi-provider coding-agent workflows, supporting hands-on experimentation with agent-driven planning, implementation, debugging, review, and model comparison.

Brio - Mobile Agent Control Plane

Independent

Built a mobile control surface for device pairing, session control, relay routing, runtime logs, and health checks around an AI agent system.

Education, Leadership and Languages

IESA: Master of Public Administration, in progress. **Universidad Central de Venezuela:** Occupational Therapy, Cum Laude, 2023.

Leadership: CTO; JA Venezuela Alumni Vice President; Dev3pack Web3 and AI hackathon hub organizer; Technovation Girls code mentor. **Languages:** Spanish (Native), English (C1).
