

Kevin Bravo

Full Stack Engineer | TypeScript, React & Node.js

Email: 0bravokevin@gmail.com | Portfolio: <https://kevinbravo.com> | GitHub: <https://github.com/0bkevin> | LinkedIn: <https://www.linkedin.com/in/0bkevin> | Location: Remote, Venezuela

Professional Summary

Full stack software engineer with 5 years of experience building production web applications, internal platforms, dashboards, APIs, workflow systems, and backend-connected product features across startup, government, nonprofit, and freelance environments. Strong background in TypeScript, JavaScript, React, SvelteKit, Next.js, Node.js web tooling, server-side TypeScript patterns, Python, Django, PostgreSQL, SQL, REST APIs, data modeling, frontend performance, cloud deployment, testing, code review, and end to end feature ownership.

Technical Skills

Frontend: TypeScript, JavaScript, React.js, Next.js, SvelteKit, Astro, HTML, CSS, Tailwind CSS, responsive UI, frontend architecture, state management, SSR, performance optimization, data visualization.

Backend and data: Node.js web tooling, server-side TypeScript, API routes, REST APIs, Python, Django, PostgreSQL, SQL, SQLite, relational data modeling, service integrations, reporting systems.

Engineering practices: Git, code reviews, maintainable code, manual QA, regression checks, feature verification, release ownership, stack debugging, CI/CD concepts, Docker, Azure, Cloudflare, AWS/GCP concepts, real-time applications, distributed-systems concepts.

Work Experience

Proyecto Educa

Chief Technology Officer

Remote, Venezuela

Dec 2025 - Present

- **Own product and technical direction** for education platforms, translating stakeholder needs into architecture, implementation priorities, testing expectations, release quality, frontend and backend execution, and shipped software.

Free2Z

Principal Software Engineer

Remote, Venezuela

Apr 2025 - Apr 2026

- **Led a production migration from React to SvelteKit**, improving frontend architecture, server-side rendering, maintainability, performance, state handling, and delivery speed for a live startup product.
- **Built and shipped backend-connected product features** by integrating frontend workflows with Python and Django APIs, delivering Dyte live video features, and building a custom CMS suite with a Markdown editor and blog engine.

U.S. Department of State (via AVAA)

Software Engineer | Full-Stack Developer

Remote, Venezuela

Nov 2024 - Aug 2025

- **Built Bilingua Talent as the sole engineer**, owning requirements, relational data architecture, backend-connected product flows, dashboards, reporting, quality checks, deployment, and maintenance.
- **Designed candidate profiles, advisor dashboards, registration flows, service-management workflows, analytics views, and access patterns** for a production platform used across centers.

Freelance

Software Engineer

Remote

Sep 2024 - Dec 2024

- **Delivered custom web applications, frontend projects, automation scripts, and product solutions** across multiple sectors, including public websites for Jenn Dolinski, Proyecto Educa, and Rodolfo Medina del Rio.

Asociacion Venezolano Americana de Amistad (AVAA)

Software Developer

Remote, Venezuela

Oct 2022 - Jul 2024

- **Built, deployed, and maintained SEP on Azure**, replacing spreadsheet-heavy operations with live scholar records, activity tracking, volunteer-hour logs, attendance workflows, reporting, and chapter visibility.
- **Engineered SEA for EducationUSA**, a full-stack operations platform centralizing advisee records, outreach activities, service history, payments, receipts, institutional alliances, and reporting.
- **Built Power BI dashboards and Python data scripts** for analytics, data cleanup, validation, historical reporting, and operational visibility.

Selected Fit

Server-side TypeScript and cloud: Built a TypeScript API route with Cloudflare Turnstile verification, Pages/Workers environment bindings, request validation, JSON responses, email integration, and error handling.

AI, financial, and real-time exposure: Daily AI-assisted engineering workflow with Codex, Claude, Cursor, Gemini, and OpenCode; agent tooling with Zrode, Brio, and Hermes; Dyte live-video feature work; Power BI dashboards; Web3 and DeFi technical writing.

Education and leadership: IESA Master of Public Administration, in progress. Dev3pack Caracas hub organizer, JA Venezuela Alumni Vice President, Technovation Girls Venezuela code mentor.

Languages: Spanish (Native), English (C1).
