

# Kevin Bravo

Product Engineer | Enterprise AI, MCP and Integrations

0bravokeyin@gmail.com | kevinbravo.com | github.com/0bkevin | linkedin.com/in/0bkevin

## Professional Summary

Product engineer with 5 years of experience building, deploying, maintaining, and supporting production backend and full-stack systems across startups, government projects, nonprofit environments, and independent work. Strong in Python, TypeScript, JavaScript, Node.js web tooling, Django, REST APIs, PostgreSQL, API integrations, HTTP debugging, cloud deployments, and AI-assisted engineering. I have repeatedly worked close to users and stakeholders: discovering undocumented workflows, building the first useful version, supporting it in production, and turning feedback and recurring issues into product improvements. I build AI agent tooling with LLM APIs, tool routing, MCP concepts, session control, logs, and health checks through Zrode and Brio. Runlayer's focus on making enterprise AI safe and simple maps closely to my experience with role-based access, production observability, explicit failure handling, and systems people rely on.

## Work Experience

- Projecto Educa** *Remote, Venezuela*  
**Chief Technology Officer** *Dec 2025 - Present*
- **Own product and technical direction** for education platforms, translating stakeholder needs into architecture, support workflows, implementation priorities, testing expectations, production issue handling, and shipped software.
- Free2Z** *Remote, Venezuela*  
**Principal Software Engineer** *Apr 2025 - Apr 2026*  
**Open-Source Contributor** *Jul 2026*
- **Led a production migration from React to SvelteKit**, improving architecture, SSR, maintainability, performance, state handling, and production behavior for a live startup platform.
  - **Shipped backend-connected product features** by integrating Python/Django APIs, Dyte live video, CMS tooling, Markdown publishing, search, translations, and operational workflows.
  - **Improved production quality and observability** through integration and regression testing, logging, health checks, deployment validation, rollback automation, Docker, Cloud Build, and Kubernetes workloads on GKE.
- U.S. Department of State (via AVAA)** *Remote, Venezuela*  
**Product Engineer | Bilingua Talent** *Nov 2024 - Aug 2025*
- **Built and supported Bilingua Talent as the sole engineer**, mapping an undocumented operational workflow into a multi-tenant product with candidate profiles, advisor dashboards, service registration, analytics, reporting, and role-based access.
  - **Piloted the product with 50 users and 5 companies**, gathered feedback from advisors and program operators, and iterated on onboarding, service-management flows, data quality, and reporting.
- Freelance** *Remote*  
**Software Engineer** *Sep 2024 - Dec 2024*
- **Delivered custom web products, automation scripts, and integrations for clients** across multiple sectors, owning discovery, prioritization, implementation, launch, iteration, and technical support.
- Asociacion Venezolano Americana de Amistad (AVAA)** *Remote*  
**Software Developer** *Oct 2022 - Jul 2024*  
**Software Developer Intern** *Sep 2021 - Aug 2022*
- **Built, deployed, and maintained SEP and SEA on Azure**, replacing spreadsheet-heavy operations with internal platforms for scholar records, attendance, services, payments, receipts, outreach, and reporting.
  - **Served as technical owner for internal users**, handling issue reports, data cleanup, user support, workflow changes, reporting reliability, and Python scripts for analytics and validation.

## Volunteer Experience

- AVAA | Education Committee Member** *Sep 2024 - Present*
- Serve as primary administrator of SEP, advise on requirements and data quality, and help program stakeholders improve workflows used by approximately 300 scholars across 3 chapters.
- JA Venezuela Alumni | Vice President** *Mar 2026 - Present*
- Set strategy with the board and lead operations, partnerships, member onboarding, and community initiatives for a national alumni network.
- Dev3pack | Global Hackathon Hub Organizer** *Apr 2026 - May 2026*
- Owned the Caracas hub's operations and mentored teams on product scope, technical decisions, final submissions, and pitches for a global Web3 and AI hackathon.

## Education and Languages

- Instituto de Estudios Superiores de Administracion (IESA)** *Caracas, Venezuela*  
*2025 - 2027*
- Master of Public Administration, in progress
- Technical:** Python, TypeScript, JavaScript, Node.js web tooling, Django, REST APIs, PostgreSQL, SQL, React, Next.js, SvelteKit, Docker, Azure, Cloudflare, HTTP debugging, API integrations, AI agents, LLM APIs, MCP concepts, session control, relay routing, logs, health checks, request validation, role-based access, and AI-assisted development.
- Languages:** Spanish (Native), English (C1 - Professional Working Proficiency).
