Work History

Chief Technology Officer at Proyecto Educa, Remote

December 2025 to Current

- Set product and technical direction for education platforms, including an internal course-streaming product, by turning stakeholder needs into prototypes, architecture, implementation priorities, testing, releases, and production support so students and staff could use one reliable system.
- Reviewed GitHub pull requests and technical decisions, then documented Agile and CI/CD release standards and walked contributors through feedback so the team could ship quickly without lowering code quality.

Principal Software Engineer at Free2Z, Remote

April 2025 to April 2026

- Led the migration of a live React product to SvelteKit using TypeScript, JavaScript, HTML, and CSS so active users received faster performance and a more maintainable experience without service interruption.
- Built and deployed full-stack multimedia features with Node.js, Django REST APIs, Dyte live video, GCP, and DevOps workflows so users could create, collaborate on, discover, and publish content from the same production product.
- Integrated a user-facing AI writing assistant with third-party LLM APIs, prompt and context design, Django services, and live platform activity so creators could turn relevant community topics into useful drafts inside their publishing workflow.

Product Engineer at U.S. Department of State via AVAA, Remote

November 2024 to August 2025

- Built Bilingua Talent as the sole engineer using TypeScript, JavaScript, React, Next.js, Node.js, and PostgreSQL so candidates, advisors, and employers could manage profiles, training services, and reports in one full-stack product.
- Designed REST APIs, SQL data models, role-based access, dashboards, and reports, then rapidly prototyped and piloted the workflows with users and companies and converted feedback into clearer interfaces, stronger validation, and production releases.

Software Developer at AVAA, Caracas

October 2022 to July 2024

- Built, deployed, and maintained two production platforms with TypeScript, JavaScript, React, Next.js, PostgreSQL, and Azure, replacing scattered spreadsheets with shared workflows for approximately 300 scholars, advisors, and staff.
- Debugged application and reporting problems using browser inspection, logs, diagnostic SQL, and Python validation scripts, then turned staff feedback into simpler interfaces and more reliable data so teams could run daily programs without manual reconciliation.

Work History (continued)

Software Developer Intern at AVAA, Caracas

September 2021 to August 2022

- Built Python data pipelines and an interactive Power BI dashboard to recover, clean, validate, and present historical alumni records so program staff could use dependable information for recurring analysis and reporting.

Selected AI and Developer Tooling

Zrode

TypeScript, React, Node.js, WebSockets

- Built and use a TypeScript and React development environment with a Node.js WebSocket server, typed events, interactive agent sessions, and automated tests so AI-assisted product work remains fast, observable, and recoverable.
- Integrated Codex, Claude Code, Cursor, and OpenCode with session control, runtime logs, and health checks, then used them daily for prototyping, debugging, and code review while manually validating output and improving Zrode from real failure patterns.

Open Source and Volunteer Leadership

Open-Source Contributor at Zed

July 2026 to Current

- Contributed Rust changes across terminal focus, Git state, settings, language-server behavior, and Markdown navigation, incorporating public issue reports and maintainer review to improve code quality and the developer experience.

Education Committee Member at AVAA

September 2024 to Current

- Maintained the participant platform and translated recurring support and data-quality problems from non-technical program leaders into clearer requirements and system improvements.

Vice President at Junior Achievement Venezuela Alumni

March 2026 to Current

- Set strategy with the board and led partnerships, operations, onboarding, and community programs for a national youth entrepreneurship and technology network.

Education

- M.P.A. from IESA (Instituto de Estudios Superiores de Administracion), in progress Expected 2027
