

Kevin Bravo

Software Engineer | Platform, Cloud and AI Systems

0bravokevin@gmail.com | kevinbravo.com | github.com/0bkevin | linkedin.com/in/0bkevin

Professional Summary

Software engineer with 5 years of experience owning production platforms from architecture and API design through deployment, incident response, and iteration. Cloud work spans GCP, Azure, AWS, and DigitalOcean, with responsibility for deployments, environment configuration, debugging, and production support. Current CTO at Proyecto Educa, responsible for technical direction, contributor reviews, release quality, and production support. At Free2Z, made asynchronous systems safe under retries and duplicate delivery; for a U.S. Department of State unit, built a multi-tenant platform from an undocumented workflow.

Technical Skills

Platform and cloud: Cloud work spans GCP, Azure, AWS, and DigitalOcean, from Dockerized services and PostgreSQL-backed systems to CI/CD, environment configuration, health checks, rollbacks, and production debugging. Backend work centers on Python, Django, TypeScript, JavaScript, REST APIs, webhooks, Pub/Sub, data modeling, and asynchronous workflows.

AI systems: Built agent pipelines for document and web research that extract facts, retrieve sources, render blocked pages, evaluate evidence, and write structured records. Experience includes RAG-style retrieval, document processing, OpenAI and Anthropic APIs, tool use, structured outputs, prompt iteration, evaluation criteria, uncertainty handling, source rejection, human-review checkpoints, caching, retries, fallbacks, and multi-model orchestration.

Engineering practice: Architecture decisions, API design, code review, mentoring, client discovery, technical tradeoffs, release ownership, CI/CD, logs, health checks, production support, and end-to-end debugging.

Work Experience

Proyecto Educa

Chief Technology Officer

Remote
Dec 2025 - Present

- Set architecture and delivery priorities for education products, taking features from operating requirements to system design, implementation, release, and production support.
- Review contributor code and system decisions, define release criteria, unblock implementation, and take responsibility for production issues.

Free2Z

Principal Software Engineer

Remote
Apr 2025 - Jun 2026

- Led a live React-to-SvelteKit migration across Dockerized Django services on GKE, Cloud SQL, GCS, Pub/Sub, Artifact Registry, Cloud Build, and Workload Identity.
- Made Pub/Sub consumers, paid-meeting webhooks, and recording ingestion safe to retry with durable event receipts, atomic database effects, processing leases, explicit ACK/NACK behavior, deployment health gates, automatic rollback, and failure-path tests.

U.S. Department of State (via AVAA)

Product Engineer | Bilingua Talent

Remote
Nov 2024 - Oct 2025

- Built Bilingua Talent as the sole engineer after mapping an undocumented client workflow; designed the PostgreSQL schema, four-role access model, REST APIs, dashboards, reporting, deployment, and support process.
- Ran product demos and a pilot with 50 users and 5 companies, then revised onboarding, service management, data validation, and reporting from what broke or confused users.

Asociacion Venezolano Americana de Amistad (AVAA)

Software Developer

Remote
Sep 2022 - Jul 2024

Software Developer Intern

Sep 2021 - Aug 2022

- Built and operated SEP and SEA for approximately 300 scholars, advisors, and staff, replacing spreadsheet workflows with PostgreSQL-backed records, payments, attendance, reporting, issue triage, and Python data checks.

Selected AI and Platform Projects

Research and Incident Verification Agent

Python, Playwright, LLM APIs

Built a Python pipeline that reads incident files, generates searches, retrieves candidate sources, renders blocked pages with Playwright, and uses LLMs to judge incident-specific evidence. Added candidate scoring, rejection reasons, uncertainty labels, caching, retries, source fallbacks, human-review signals, and model escalation.

Zrode and Brio

AI Agents, Platform Tooling

Build and use an agentic development environment and control plane for multi-provider coding workflows, session control, relay routing, runtime logs, health checks, and operational visibility.

Open Source, Mentoring and Leadership

Zed: Contributed to the open-source Zed code editor. **Technovation Girls Venezuela:** Mentored 4 students from research to a working mobile prototype. **Dev3pack:** Organized a global Web3 and AI hackathon hub and mentored teams on scope and technical decisions.

Education and Languages

Instituto de Estudios Superiores de Administracion (IESA)

2025 - 2027

Master of Public Administration, in progress. **Languages:** Spanish (Native), English (C1 professional proficiency).
