

Kevin Bravo

Senior Software Developer | Full-Stack TypeScript, Node.js and React

0bravokevin@gmail.com | kevinbravo.com | github.com/0bkevin | linkedin.com/in/0bkevin | Remote

Professional Summary

Full-stack software engineer with 5 years of experience designing, shipping, and operating production systems. Strong in TypeScript, JavaScript, Node.js web tooling, React, Astro, Python, Django, Prisma, PostgreSQL, REST APIs, relational data modeling, and responsive product interfaces. Comfortable owning features from schema design and backend logic through frontend implementation, deployment, debugging, monitoring, and iteration. Experienced with Docker, Azure, GCP, Cloud Build, Git, CI/CD concepts, production troubleshooting, and AI-assisted development in self-directed environments.

Technical Profile

Backend and data: TypeScript, JavaScript, Node.js, Python, Django, REST APIs, PostgreSQL, Prisma, SQL, relational schema design, database migrations, query-oriented data modeling, webhooks, asynchronous workflows, idempotency, retries, request validation, and reporting systems.

Frontend and product: React, Next.js, Astro, SvelteKit, HTML, CSS, Tailwind CSS, responsive interfaces, component architecture, server-side rendering, dashboards, role-based workflows, CMS tooling, and frontend performance.

Delivery and operations: Git, Docker, Azure, Azure VPS operations, GCP, GKE, Cloud SQL, GCS, Pub/Sub, Cloud Build, Cloudflare, GitHub Actions and CI/CD concepts, environment configuration, logs, health checks, deployment validation, rollback, and production debugging.

Engineering practices: End-to-end feature ownership, code review, integration and regression testing, concurrency and failure-path testing, technical documentation, independent execution, clear written communication, and AI-assisted planning, implementation, debugging, and refactoring.

Work Experience

Proyecto Educa

Chief Technology Officer

Remote

Dec 2025 - Present

- **Own architecture and technical priorities** for education platforms, translate ambiguous requirements into implementation plans, and remain accountable for release quality and production support.
- **Lead hands-on execution across backend, frontend, automation, deployment, and reliability**, making pragmatic decisions while keeping systems maintainable and useful.

Free2Z

Principal Software Engineer

Remote

Apr 2025 - Apr 2026

Open-Source Contributor

Jul 2026

- **Led a live migration from React to SvelteKit** within a production GCP platform using Dockerized Django and SvelteKit services on GKE, Cloud SQL, GCS, Pub/Sub, Artifact Registry, Cloud Build, and Workload Identity.
- **Shipped and maintained full-stack features** across frontend workflows, Django REST APIs, PostgreSQL data, live video integrations, a Markdown editor, CMS tooling, publishing, and search.
- **Hardened asynchronous production workflows** with durable idempotency, atomic balance and audit effects, publish-after-commit logic, verified webhooks, processing leases, explicit ACK/NACK behavior, and retry-safe ingestion.
- **Strengthened deployments and recovery** with worker health gates, automatic rollback, retry-safe PostgreSQL migrations, real-database concurrency tests, and failure-path validation.

U.S. Department of State (via AVAA)

Product Engineer | Bilingua Talent

Remote

Nov 2024 - Aug 2025

- **Built and operated a multi-tenant platform as the sole engineer**, owning PostgreSQL data architecture, backend workflows, role-based authorization, dashboards, reporting, deployment, and production support.
- **Piloted the system with 50 users and 5 companies**, then revised registration, service-management, data-quality, and reporting flows from operational feedback.

Asociacion Venezolano Americana de Amistad (AVAA)

Software Developer

Remote

Oct 2022 - Jul 2024

Software Developer Intern

Sep 2021 - Aug 2022

- **Designed, deployed, and maintained SEP**, a Next.js, TypeScript, PostgreSQL, Prisma, Auth.js, and Azure platform that replaced spreadsheet-based operations for approximately 300 scholars across 3 chapters.
- **Built SEA for EducationUSA**, modeling advisee histories, paid services, payment and receipt records, outreach, and reporting; wrote Python workflows to normalize historical data and improve data integrity.

Selected Projects and Proof of Work

Astro and TypeScript web products: Shipped public websites and product surfaces with Astro, TypeScript, and Tailwind CSS, owning responsive UI, content structure, forms, performance, and deployment.

Portfolio API workflow: Built a TypeScript API route with Cloudflare Pages/Workers, Turnstile validation, environment bindings, JSON responses, email integration, and explicit error handling.

Zrode and Brio: Build and operate applied AI and agent tooling for multi-provider coding workflows, session control, relay routing, logs, health checks, and operational visibility.

Education and Languages

Instituto de Estudios Superiores de Administracion (IESA)

Master of Public Administration, in progress

Languages: Spanish (Native), English (C1 professional proficiency).

*Remote
2025 - 2027*
