Education

Instituto de Estudios Superiores de Administracion (IESA)

Master of Public Administration, in progress

Remote

2025 - 2027

Experience

Proyecto Educa

Remote

Chief Technology Officer

Dec 2025 - Present

- Own architecture, technical priorities, and hands-on delivery for education platforms, translating ambiguous requirements into implementation plans and production releases.
- Lead backend, frontend, automation, deployment, reliability, and production-support decisions while keeping systems maintainable and useful.

Free2Z

Remote

Principal Software Engineer

Apr 2025 - Apr 2026

Open-Source Contributor

Jul 2026

- Led a live React-to-SvelteKit migration across Dockerized Django and SvelteKit services on GCP, GKE, Cloud SQL, GCS, Pub/Sub, Artifact Registry, Cloud Build, and Workload Identity.
- Shipped full-stack features across frontend workflows, Django REST APIs, PostgreSQL data, live video integrations, Markdown editing, CMS tooling, publishing, and search.
- Hardened asynchronous workflows with idempotency, atomic balance and audit effects, publish-after-commit logic, verified webhooks, processing leases, explicit ACK/NACK behavior, health gates, automatic rollback, and failure-path tests.

U.S. Department of State (via AVAA)

Remote

Product Engineer | Bilingua Talent

Nov 2024 - Aug 2025

- Built and operated a multi-tenant platform as the sole engineer, owning PostgreSQL data architecture, backend workflows, role-based authorization, dashboards, reporting, deployment, and production support.
- Piloted the system with 50 users and 5 companies, revising registration, service-management, data-quality, and reporting flows from operational feedback.

Asociacion Venezolano Americana de Amistad (AVAA)

Remote

Software Developer

Oct 2022 - Jul 2024

Software Developer Intern

Sep 2021 - Aug 2022

- Designed, deployed, and maintained SEP, a Next.js, TypeScript, PostgreSQL, Prisma, Auth.js, and Azure platform replacing spreadsheet-based operations for approximately 300 scholars across 3 chapters.
- Built SEA for EducationUSA, modeling advisee histories, paid services, payment and receipt records, outreach, and reporting; wrote Python workflows to normalize historical data and improve data integrity.

Freelance

Remote

Software Engineer

Sep 2024 - Dec 2024

- Delivered Astro and TypeScript websites, API-connected workflows, responsive interfaces, forms, performance improvements, and production deployments across multiple client projects.

Leadership & Activities

Dev3pack

Remote

Global Hackathon Hub Organizer

Apr 2026 - May 2026

- Organized the Caracas hub for a global Web3 and AI hackathon, coordinating mentors, sponsors, speakers, logistics, and participant support.

AVAA Education Committee

Remote

Technical and Operations Volunteer

Sep 2024 - Present

- Maintain SEP workflows and advise on requirements, data quality, technical feasibility, and reporting for approximately 300 scholars across 3 chapters.

Skills & Interests

Technical: TypeScript, JavaScript, Node.js, React, Astro, Next.js, SvelteKit, Python, Django, Prisma, PostgreSQL, SQL, REST APIs, relational schema design, database migrations, Docker, Azure VPS operations, GCP, GKE, Cloud SQL, GCS, Pub/Sub, Cloud Build, Cloudflare, Git, GitHub Actions and CI/CD concepts, server-side rendering, logs, health checks, deployment validation, rollback, monitoring, and API integrations.

Engineering: End-to-end feature ownership, backend architecture, responsive UI, production debugging, query-oriented data modeling, webhooks, asynchronous workflows, idempotency, retries, integration testing, regression testing, failure-path testing, code review, technical documentation, and independent execution.

AI: AI-assisted planning, implementation, debugging, refactoring, code review, and research; builder and daily user of Zrode and Brio, applied tools for multi-provider coding workflows, session control, relay routing, logs, health checks, and operational visibility.

Languages: Spanish (Native), English (C1 professional proficiency).

Interests: Self-hosted software, developer tools, open-source systems, production reliability, Web3, and applied AI.
