Work History

Chief Technology Officer at Proyecto Educa, Remote

December 2025 to Current

- Owned the product roadmap and platform architecture for internal education systems, turning ambiguous stakeholder workflows into requirements, priorities, production releases, and continuous improvements so staff could operate without waiting for perfectly defined specifications.
- Led hands-on delivery of an internal course-streaming platform across frontend, backend, database, access control, deployment, and production support so students and staff could use one maintainable system for educational content.
- Reviewed GitHub pull requests and technical decisions, documented architecture and release processes, and communicated progress, risks, and tradeoffs to non-technical leaders so contributors could deliver with shared standards and fewer knowledge gaps.

Principal Software Engineer at Free2Z, Remote

April 2025 to April 2026

- Led the modernization of a live React product to SvelteKit using TypeScript, JavaScript, HTML, and CSS so active users received faster performance and a more maintainable experience without service interruption.
- Built full-stack workflows with Node.js web tooling, Python/Django REST APIs, PostgreSQL, Dyte live video, and a custom CMS so customers could create, manage, discover, and publish content from the same product.
- Stabilized asynchronous PostgreSQL workflows with verified webhooks, idempotency, retries, and failure-path tests so duplicate events and transient outages could not corrupt user operations.
- Improved DevOps and production recovery with Docker, GCP, Cloud Build, logging, health gates, and automated rollback so releases could move from staging to production with safer failure handling.

Product Engineer at U.S. Department of State via AVAA, Remote

November 2024 to August 2025

- Built Bilingua Talent as the sole engineer using TypeScript, JavaScript, React, Next.js, Node.js, and PostgreSQL so candidates, advisors, employers, and administrators could manage services and opportunities in one platform.
- Designed the relational schema, Prisma migrations, REST APIs, role-based access, dashboards, and reporting flows so four user groups could share dependable operational data without relying on disconnected spreadsheets.
- Gathered requirements directly from users, rapidly prototyped workflows, ran demos and a live pilot, and converted feedback into documented product decisions and production releases.

Work History (continued)

Software Developer at AVAA, Caracas

October 2022 to July 2024

- Built and maintained two internal platforms with TypeScript, JavaScript, React, Next.js, PostgreSQL, and Azure, replacing spreadsheets with shared workflows for approximately 300 scholars, advisors, and staff.
- Owned production support through browser debugging, logs, diagnostic SQL, Python validation scripts, and stakeholder walkthroughs, then turned recurring issues into clearer interfaces, reliable reports, and documented operating processes.

Software Developer Intern at AVAA, Caracas

September 2021 to August 2022

- Built Python data pipelines and an interactive Power BI dashboard to recover, clean, validate, and present historical records so program staff could use dependable information for recurring analysis and reporting.

Selected AI and Developer Tooling

Zrode - Open-Source Agent Development Environment

TypeScript, React, Node.js, WebSockets

- Built and use a React interface and Node.js WebSocket server for Codex, Claude Code, Cursor, and OpenCode, with typed events, session orchestration, checkpoints, runtime logs, health checks, and automated tests so AI-assisted development remains observable and recoverable.
- Used Zrode daily for requirements analysis, prototyping, implementation, debugging, documentation, and code review while manually validating generated work for security, maintainability, and production readiness.

Open Source and Volunteer Leadership

Open-Source Contributor at Zed

July 2026 to Current

- Contributed Rust changes across terminal focus, Git state, settings, language-server behavior, and Markdown navigation, incorporating public issue reports and maintainer review to improve code quality and the developer experience.

Education Committee Member at AVAA

September 2024 to Current

- Maintained the participant platform and translated recurring support and data-quality problems from non-technical program leaders into requirements, priorities, and system improvements.

Vice President at Junior Achievement Venezuela Alumni

March 2026 to Current

- Set strategy with the board and led partnerships, operations, onboarding, and community programs for a national youth entrepreneurship and technology network.

Education

- M.P.A. from IESA (Instituto de Estudios Superiores de Administracion), in progress Expected 2027
